Google Play: Yaqeen Azkar · Yaqeen Quiz · PopRoom

PROFESSIONAL SUMMARY

Mobile App Developer specialized in Flutter with **4+ years** of hands-on experience delivering **30+ cross-platform products** for clients and businesses across **Saudi Arabia, Kuwait, and Egypt**. Strong end-to-end ownership from requirements gathering, scenario design, and analysis to architecture, development, testing, store publishing, and iteration. Proven delivery across social apps, e-commerce, real estate, health, education, IoT-related products, and Islamic apps — including multiple Google Play releases. Combines clean Flutter engineering (Bloc/Cubit, Clean Architecture, Firebase, REST APIs) with a practical **Project Manager mindset** focused on clarity, priorities, and business outcomes.

CORE COMPETENCIES

- Flutter / Dart (Android, iOS, Web) · Clean Architecture · Bloc / Cubit / Provider
- Firebase (Auth, Firestore, Realtime DB, FCM, Cloud Functions) · REST APIs · SQLite / Hive
- Real-time apps (WebRTC / LiveKit / WebSockets) · Notifications · Payments · Maps / Location
- Requirements analysis · User scenarios · Feature prioritization · Stakeholder alignment
- Google Play / App Store publishing · Performance optimization · Localization (AR/EN)
- Markets: Saudi Arabia · Kuwait · Egypt · Freelance & client delivery

PROFESSIONAL EXPERIENCE

Mobile App Developer (Flutter) | Freelance & Client Projects

Jan 2021 – Present · Cairo, Egypt (Remote-friendly) · Clients across Egypt, Saudi Arabia & Kuwait

- Delivered 30+ mobile projects across multiple domains (social, commerce, real estate, health, education, Islamic apps), from discovery to production release.
- Led delivery with a Project Manager approach: gathering requirements, writing scenarios, analyzing user flows, prioritizing backlog items, and aligning clients on scope and milestones.
- Built production Flutter apps using Clean Architecture, Bloc/Cubit, Firebase, REST APIs, offline storage, push notifications, payments, maps, and localization.
- Published and maintained apps on Google Play (Yaqeen – Muslim Remembrance, Yaqeen – The Test Arena, and PopRoom), handling signing, store listing, and release quality.
- Collaborated with stakeholders in Saudi, Kuwaiti, and Egyptian markets, adapting UX and features to local expectations and business goals.
- Owned full lifecycle work: UI implementation, integrations, performance tuning, bug fixing, store deployment, and post-launch improvements.

SELECTED PROJECTS

- Yaqeen – Muslim Remembrance** — Azkar, prayer times, Qibla, Quran tafsir, Islamic radio, tasbeeh & notifications. Google Play
- Yaqeen – The Test Arena** — Interactive Islamic quiz with categories, rewards, audio/animation & gamification. Google Play
- PopRoom** — Voice rooms (public/private), diamonds & packages. Google Play
- Diyyarak** — Real-estate platform for Aswan (rent/sale, shops, apartments, villas), viewing requests, notifications & admin app.
- Qimni** — Linktree-style commerce app (links, shop, subscriptions, analytics, commissions).

- **Dawa** — Medicine alternatives, ML support, interaction checks, pharmacy requests, availability alerts & dose reminders.
- **Arabic Braille** — Braille learning (letters/numbers), voice support, animations, practice & abbreviations.
- **Bur** — AI wellness app (voice/text mood input, goals & activities, garden gamification, analytics, mini-games).
- Also delivered: Al-Baseet Store, Yaqool Al-Sheikh, AOU Connect, Meknaz, Inner Peace, and more.

TECHNICAL SKILLS

- **Languages:** Dart, Python
- **Mobile:** Flutter (Android/iOS/Web/Desktop), Custom Widgets, Responsive UI, Animations, Deep Linking, Localization
- **State & Architecture:** Bloc, Cubit, Provider, Clean Architecture, MVVM, SOLID, DI
- **Backend/Data:** Firebase, REST APIs, SQLite, Hive, Secure Storage
- **Realtime & Device:** LiveKit, WebSockets, Camera, GPS, Sensors, Bluetooth, Push/Local Notifications
- **Payments & Release:** Stripe, PayPal, In-app Purchases, Google Play Console, App Store readiness
- **Tools:** Git/GitHub, Postman, Android Studio, VS Code
